Sample Illustration

Prateek, a 40 year old man wants to accumulate some money for after his retirement. He decides to save with Shriram Pension Plus. He opts for a Policy Term and Premium Payment Term of 15 years and pays annualized premium of ₹ 1,00,000 + taxes

His Vesting Benefit will be Rs. 17,10,596 (@4%) / Rs. 23,83,674 (@8%) and he decides to purchase annuity with the full amount. He chooses to buy annuity from *Shriram Life Immediate Annuity Plus* and chooses *Option 1 – Annuity for Life* and will receive Rs. 1,47,187 (@4%) / Rs. 2,05,101 (@8%) per annum till his date of death.

This illustration is based on a standard life and is intended to show how the unit fund, net of charges and taxes, may grow over the years of the policy term if the fund earns a gross return of 8% p.a. or 4% p.a. These rates, i.e., 8% p.a. and 4% p.a. are assumed only for the purpose of illustrating benefits if the returns are at this level. It should not be interpreted that the returns under the plan are going to be either 8% p.a. or 4% p.a.

Vesting Benefit mentioned corresponds to the gross investment return, net of all charges but does not consider mortality, morbidity charges, underwriting extra, if any, guaranteed charges and cost of riders. It demonstrates the impact of charges and taxes on the net yield. Please note that the mortality charges per thousand sum assured in general, increases with age.

The actual returns can vary depending on the performance of the chosen fund, charges towards mortality, morbidity, underwriting extra, cost of riders, etc. The actual annuity amount depends on the prevailing annuity rates at the time of vesting.
